

Science Newsletter - Acorn Jubilee School

Summer Term | Inspiring curiosity. Developing futures.

Welcome to the Summer Term! We hope everyone had a restful break and is ready for a productive and engaging final term of the academic year.

This Term: Science

Through practical investigations and engaging lessons, students will develop their understanding, curiosity, and confidence in scientific thinking.

What Students Will Be Learning

- **Key Stage 2:** Students will be focusing on ecosystems and adaptations, exploring how living things interact with their environment and how they adapt to survive in different habitats.
- **Key Stage 3:** Students will be studying ecosystems and adaptations, building on their prior knowledge to develop a deeper understanding of food chains, habitats, and environmental change.
- **Key Stage 4 (Year 10):** Students will be studying waves, including their properties, behavior, and real-world applications.
- **Key Stage 4 (Year 11):** The focus will be on exam preparation, with targeted revision, practice questions, and support to help students feel confident and fully prepared for their final exams

Enrichment Opportunities

To support learning in science, students will have access to:

- Practical experiments and investigations
- Science-focused activities and challenges
- Opportunities to develop analytical and problem-solving skills

Supporting Our Students

We encourage all students to stay organised, engaged, and proactive in their learning. Year 11 students in particular should make full use of revision resources and support sessions available.

James Shaw - Science Lead
