

Vengeance Autumn Newsletter

Working Towards Success

Vengeance have made a positive start to Year 11 and are working towards a range of qualifications across the curriculum.

In Maths, pupils are working towards Entry Level, Functional Skills and GCSE qualifications. Lessons include regular past-paper practice, with a current focus on shape and angles. In English, pupils are working towards Functional Skills and GCSE while studying the supernatural, using Macbeth as a stimulus. In Science, pupils are developing their knowledge and skills as they work towards Entry Level qualifications.

The group are also progressing well in their option subjects. Some are studying GCSE History, currently focusing on the Cold War, while others are completing BTEC Cooking, Design Technology and Music, including working towards grades in drums.

In PE, pupils are currently enjoying bowling. They also have opportunities to explore personal interests through AQA Unit Awards and are using Careers lessons to consider their options and next steps after Year 11.

It has been an encouraging start, and we look forward to seeing Vengeance continue to develop their confidence, skills and qualifications throughout the year.
