

This year, Year 11 students will focus on completing their RSL Grade 4 music exams, while Year 10 students work towards their Debut and Level 1 qualifications. In addition to our annual Christmas concert, we are excited to expand our performance calendar to include a new Halloween celebration and hopefully celebrating other holidays throughout the year.

Looking ahead, Year 11 will also begin preparing for their leavers' concert at the Wedgewood Rooms in Portsmouth, building on the success of last year's main event, we aim to make this event bigger, better and more entertaining than last year!

Alongside their music studies, students will be enrolled in a new ICT course specifically tailored for an SEN setting, delivered under the guidance of The Learning Machine. Recognized by Ofqual, this course enables students to build a portfolio of evidence, helping them develop essential, functional ICT skills for adult life after Jubilee School. The flexible structure allows students to achieve recognized qualifications while adapting their learning styles to suit their individual needs. Each student from every year group will start to build and create their portfolio of evidence to create a bank of work that will increase their chances of success and develop the necessary skills to become independent with ICT.
