

An Amazing Week at Jubilee School's Summer Forest School

What an adventure we had at Jubilee School's very first Summer Forest School! After Roots completed its successful full year of Forest School sessions, we were excited to open our gates during the summer holidays and welcome children for a full week of outdoor fun, exploration and adventure.

From the moment they arrived, the children settled straight back into the Forest School environment beautifully, becoming relaxed, happy and completely engaged in the environment around them.

There was something new to discover every day, from herding escaped goats, exploring the woods on nature walks, to spotting new wildlife, foraging berries around the forest.

The children loved testing out our brand-new slack line, which challenged them to balance, wobble, fall off and try again. We spent time foraging for wild berries and then turned our finds into fresh homemade jam, which was a real favourite. They were able to take this home with them and were excited to share with parents and carers.

With the hot summer weather bringing a fire ban, we swapped our usual campfire out for the gas cooker and spent lots of time cooking and creating delicious food together. We also enjoyed a fantastic music day, filling the Forest School with sounds, songs and plenty of creativity. Most importantly, the children had the freedom to explore, play, take risks, get

stuck in and enjoy being outdoors at their own pace. The smiles, laughter and enthusiasm throughout the week were fantastic, and the incredibly positive feedback from the children, parents and carers showed just how special the week had been. It was a brilliant first Summer Forest School - full of adventures, new experiences, wildlife, creativity and happy memories!

We look forward to the year ahead and to returning in the summer of 2027!

Many thanks to all that help and got involved from Joel & Ian - Jubilees Roots Forest School team.
